Using this guide (1)

This product is a guide is for employees of a user-to-user service, or third parties reporting on behalf of an organisation, to use the CSEA Industry Reporting Portal (CSEA-IRP). The portal allows organisations to report child sexual exploitation and abuse (CSEA) on their platforms to the National Crime Agency (NCA).

Once you have identified a CSEA offence (listed as part of Schedule 6 of the [Online Safety Act](#)) on your organisation's service, information you have relating to the suspected offence and the users involved is required. The data fields required on the CSEA-IRP have been designed to gather as much relevant information possible which will allow law enforcement agencies to identify offenders and safeguard victims.

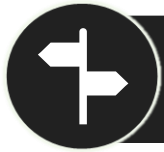

This guide will help you understand the process of creating and editing a report organisation. This will allow administrators of an organisation to pre-define the questions throughout the reporting process. These questions will then be pre-filled when a user begins a new referral, speeding up the process for organisations.

template for your
answers to specific

Important

If you need guidance on a Priority 1 report where there is a current or imminent risk to an individual, please read the [Urgent priority 1 reports](#) section.

Navigating to Template Management

If you are an administrator for your organisation (which is the default role for those who created the organisation account), there will be a link within the main home page of the portal titled '[Set up a report template for your organisation](#)' which will provide access to the template management home.

The image displays two side-by-side screenshots of the CSEA Industry Reporting Portal.

- Beta Notice:** This is a new service. Help us improve it and [give your feedback \(opens in new tab\)](#).
- Test:** Organisation admin
- Message:** You currently do not have a template configured for your organisation. Click the button below to begin creation of a template.
- Create template:** [Create template](#)

Selecting 'Create a Template' will take you through a handful of questions from the platform to determine whether they are a consistent response for your organisation.

If your organisation only uses a single Platform, this can be pre-set on this page.
