Using this guide (1)

This guide is for employees of a user-to-user service or third-party reporting child sexual exploitation and abuse (CSEA) to the National Crime Agency (NCA) on behalf of an organisation via the CSEA Industry Reporting Portal (CSEA-IRP). The reporting service is available 24 hours a day, 7 days a week.

Once you have identified a CSEA offence (listed as part of [Schedule 6 of the Online Safety Act](#)) on your organisation's service, please provide as much relevant information as possible relating to the suspected offence and the users involved when making a report. This will allow law enforcement agencies to identify offenders and safeguard victims.

This guide will help you to understand the process for submitting individual CSEA reports to the NCA via the CSEA-IRP and will provide you with:

- an overview of the portal
- an overview of the submission process
- information on the type of questions you will be asked when submitting a report

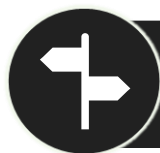

Registering an individual user:

If you are an Organisation Administrator and require guidance on how to register an individual user within your organisation to use the CSEA-IRP, please refer to the "How to register an individual user" guidance. This guidance would have been provided to the original Organisation Administrator when your organisation first registered to use the portal. It can also be found on the CSEA-IRP under the "help" section

Important

If you need guidance on a Priority 1 report where there is a current or imminent risk to an individual, please read the [Urgent priority 1 reports](#) section.

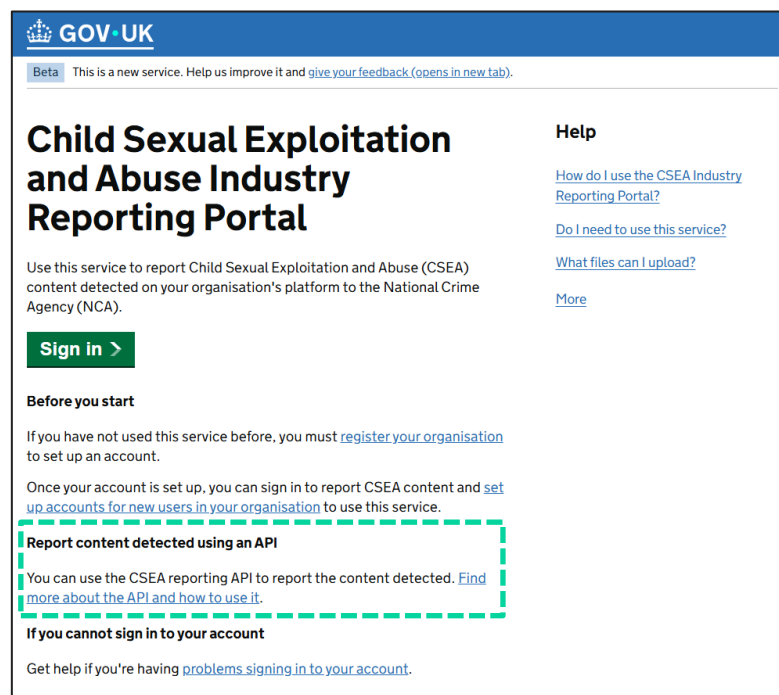

Using this guide (2)

There are two ways your organisation can report child sexual exploitation and abuse:

- manually submit individual reports through the portal
- submit reports in bulk automatically through our Application Programming Interface (API)

This guide will focus on how to manually submit individual reports to the Child Sexual Exploitation and Abuse Industry Reporting Portal. For details on how to submit through the API, select the link under “Report content detected using an API” on the sign-in page of the portal, as shown in the screenshot below. Your Organisation Administrator would have been provided with guidance documentation on how to set up the API.

! Urgent priority 1 (P1) reports

If you have detected a priority one (P1) where there is information which suggests that there is an immediate threat to a child's life, or immediate risk of serious harm to a child, it is important that you submit this report immediately.

Submit the report through the portal as usual with the information you have to hand, including the suspected illegal content.

For P1 reports, the priority is that the appropriate law enforcement agency receives the relevant information as quickly as possible to safeguard victims. Therefore, in these instances, you can select "data not held" for any mandatory data fields if you do not yet have that information to hand. You can provide the missing data later by submitting a supplementary report.

Once the report has been submitted, you can submit a [supplementary report](#) through the portal with any missing data not provided on the initial urgent report.

The CSEA-IRP appears to be unavailable, how do I submit a priority 1 report?

Should the portal be unavailable, use the Priority One Contingency Reporting Template which can also be found on page ____.

Once you have completed the report, send it immediately to DRB@nca.gov.uk and follow up with a call to 01925 663355 to ensure they are notified of the P1 report. This telephone number must not be used for any other enquires or communications.

Once the portal has been restored, submit the report with any missing data through the portal.

Priority level definitions can be found on [page 15](#)

Mandatory data fields

The [Online Safety \(CSEA Content Reporting by Regulated User-to-User Service Providers\) Regulations 2026](#) (Reporting Regulations) outline the information an in-scope user-to-user service must provide when reporting CSEA to the NCA. The CSEA-IRP requests data mandated by the Reporting Regulations as well as other information that may help law enforcement investigate an offence. Schedule 1 of the Reporting Regulations outlines the information which an organisation must provide, where that information is available to the organisation.

Mandatory data fields are marked with an asterisk “*” on the portal.

EXAMPLE

Time uploaded to the platform*

For example 18:03:04

Hour	Minute	Second	Time zone*		
	:		:		

☐ Data not held

Important: A report cannot be submitted unless the mandatory data fields are completed. If your organisation does not hold the mandated data being requested, please select the relevant tick box.

Before submitting a report, you are required to read the Declaration. Positively selecting that you have read this will indicate to the NCA and the Regulator (Ofcom) that any mandatory fields where information was not provided, are because your organisation does not hold that information at the time of submission.

Uploading material

Uploading suspected illegal material:

You are required to upload the suspected illegal material being reported under the “Information linked to reported illegal content” section. Here you will find the “Upload the content detected” data field where you can upload the material using the ‘Choose file’ button. Please note that this should be in the original format and unedited at the point of submission to the NCA.

You must only report one ‘sender’ per report. Therefore, you must only upload the illegal material which that sender uploaded onto the service. For further information, including guidance on where a sender has uploaded more than one image/video, and illegal chat/messages, please read the [Upload content detected](#) section.

Uploading non-illegal material:

Within the “Information linked to user” section, there is an option at the end to upload files under the “Additional documents” field. This is where an organisation can upload any non-illegal material, documents or files which have not been requested as part of the report that may assist law enforcement in identifying that specific user.

Supported file types and size limits:

Material can be uploaded in any format, with the exception of executable (.exe) files, and must be no larger than 5 GB. If you have a file that is .exe or is larger than 5 GB, please convert it to a different file type or size to enable you to submit the report with the file included. If your file continues to get blocked, contact the Service and Support desk via telephone 0330 1110066 (UK) / +44 161 521 8753 (International) or email support@csea-irp.atlassian.net. Please note, the Service and Support desk can only assist with tech queries and not the contents of a report.

Signing in

To access the Child Sexual Exploitation and Abuse Industry Reporting Portal you will need to sign in using your individual log-in details which you would have set-up when you first registered.

Your Organisation Administrator(s) can register individuals to use the portal. If you are an Organisation Administrator and require guidance on how to register an individual user, please refer to the “How to register” guidance in the first instance.

Priority level overview

You will be asked to select the appropriate priority level for the report you are submitting. There are three options:

1. there is current or immediate risk to an individual
2. there is a possible risk to an individual in the near future or is time-sensitive
3. other

The next page details the definitions for each priority level.

?

The next page will detail the definitions for each of the priority levels

Priority level definitions

Priority 1 – current or immediate risk to an individual: this should be selected when there is an identified real and immediate threat to a loss of life or to cause serious harm or injury, which includes serious sexual assault and rape. This also includes where a child has been identified as needing immediate safeguarding as the abuse is currently taking place or there is imminent risk of abuse.

If you need to make a Priority 1 report, please refer to the [Urgent priority 1 reports](#) section.

Priority 2 – possible risk to an individual in the near future or is time-sensitive: this should be selected when safeguarding action is needed urgently but there is no immediate threat. This could be for example, where you believe that potential contact offending has taken place or you have detected content which indicates recently generated images. This also includes reports where a child has produced self-generated images or has received/sent child sexual abuse material.

Priority 3 – other: this should be selected when there is no impending danger to a child. This could include known images or URLs that have matched against a hash list and/or problematic chat has been detected with no sharing of child abuse material. This could also include material being shared amongst known adults where the ages of the individuals within the material are indeterminate, unless there is an immediate threat to life.

General information about the report

The “General report information” section consists of data fields summarising the general information relevant to the report. This supports the NCA in linking the report to any previous reports and allows law enforcement to contact the reporter if further information is required.

Upload content detected

This is the section where you upload the child sexual exploitation and abuse (CSEA) content you are reporting and the details of that content.

You can only submit one 'sender' per report (see [page 31](#) for more information). Therefore, you must only upload the illegal material which that sender uploaded onto the service. See 'User status' for more information on what is deemed a sender.

You can add as many files as necessary, however they all have to relate to the report and have been uploaded/sent by the sender you are submitting within the report.

Where a sender has uploaded more than one image/video, upload the image/video which was first detected by the organisation as "File 1", followed by the additional illegal material found by the organisation when "File 1" was detected. After "File 1", the additional illegal material does not need to be uploaded in any specific order, but must have been uploaded to the service by that particular sender for that report and the correct IP address, date and time must correspond to each uploaded file. You can add additional content to the report by selecting "Add file".

If your report relates to suspect illegal chat/messages, upload a copy of the entire chat between the sender, and the recipient(s), in addition to any suspected CSEA content the sender has uploaded into the chat/messages.

- [Group chat and chat room information](#)
- [More information about the files you have uploaded](#)

Custom file name: Provide a file name for the material you are reporting. This is for your purposes only to remind you which file you are referring to.

Upload the content detected*: Upload the content being reported using the “Choose file” function. Please note that this should be in the original format and unedited. You must only submit one [sender](#) per report. Therefore, you must only upload the illegal material which that sender uploaded onto the service. For more information on how to report multiple senders, read the [How to report multiple 'senders'](#) section.

Date uploaded to the platform*: Provide the date that the reported content was uploaded to the platform by the user. This must be submitted in DD/MM/YYYY format.

File information (2)

Time uploaded to the platform*

For example 18:03:04

Hour Minute Second Time zone*

: :

☐ Data not held

IP address of the device the file was uploaded from*

Provide the port number if available. For example, 17.168.1.67 port 80.

IP address Port

Required Required

☐ Data not held IP address ☐ Data not held port

Date associated to IP address

For example, 27 03 2024

Day Month Year

☐ Data not held date

Time associated to IP address

For example 18:03:04

Hour Minute Second Time zone

: :

☐ Data not held time

Time uploaded to the platform*: Provide the time that the reported content was uploaded to the platform by the user. This must be provided in HH:MM:SS format. You must also provide the time zone your company has recorded. If possible, use UTC.

IP address of the device the file was uploaded from*: Provide the IP address and the Port number at the time the reported content was uploaded to the platform by the sender. Both IP address and port number are mandatory.

Date associated to the IP address: Provide the date associated to the IP address. This must be submitted in DD/MM/YYYY format.

Time associated to IP address: Provide the time associated to the IP address. This must be provided in HH:MM:SS format. You must also provide the time zone your company has recorded.

Note: If the reported content spans a length of time e.g. a chat message thread, the data fields required on this page would be in relation to the date and time when the suspected illegal activity began. If it relates to a single image/video, it would be at the point the media was uploaded onto the platform.

File information (3)

Name of file when uploaded on your platform

This must be the original file name.

Original hash of file*

This is a unique string of numbers that identifies the file.

☐

Data not held

URL of the reported content at the point of upload*

Enter the URL in full, for example, www.gov.uk/example.

☐

Data not held

Has your organisation kept the EXIF data related to the detected content?*

This is technical information stored about a photo or video. Certain file types which are not permitted will not be able to be selected.

☐

Yes

☐

No

☐

Data not held

Save and continue

Name of file when uploaded on your platform: If known, provide the name of the file, image or video as uploaded or created by the sender that is being reported. A file name is the complete title of a file and file extension e.g. readme.txt is a complete file name.

Original hash of file*: Provide the unique numeric hash value of the content being reported, or confirm that the reporting organisation does not hold the hash value. This enables law enforcement to prioritise referrals by determining if the hash value was previously known. For images which have been detected by the organisation using a hash list, please provide the original hash of the known image.

URL of the reported content at the point of upload*: Insert the full URL, also referred to as a web address, where the reported content was hosted at the point of upload.

EXIF data related to the detected content*: Confirm whether any exchangeable image file format (EXIF) data is held on reported content. If you select 'Yes', please upload or input the EXIF data on that content using the "Choose file" option and the text box field.

EXIF information stores data about media created and can include (but not limited to) information such as the date/time the media was captured, location information, camera settings and image metrics. This information is used to assist law enforcement in attributing an offender or identifying a victim.

Account username*: Provide the username as displayed on the platform at the time of the incident being reported.

Name provided at registration: Provide the first name, middle name and last name as provided by the user at the point of registration. If any of these names have been changed by the user since registration, please include these in the “Other names used” data field.

Other names used: Provide any additional usernames, profile names, or display names used by the user. These could include profile names, vanity names, display names, previous usernames or nicknames etc. If providing previous usernames, please also include dates for when the user had these if known.

How to report multiple senders

If you are reporting an incident which involves multiple senders, you must submit a report per sender and list all recipients of that child sexual exploitation and abuse (CSEA) content.

For example, if you have a group chat where three users (user X, user Y, user Z) posted CSEA into the group chat, you must submit three individual referrals for each sender and list all of the recipients. Therefore, when submitting the referral on the content user X uploaded to the group chat, you would list user X as the sender, and user Y, user Z and any other users within that group chat as recipients. This is because, in this example, there are three separate incidents of CSEA offending which need to be reported separately.

If the user you are reporting within the referral is a moderator or administrator of a group chat or chatroom, please state this under the “Additional information” field which will be found towards the end of the “Information linked to the user” section.

Do you think this is a compromised account? If you select 'Yes', please provide the reasons in the text box. A compromised account refers to any account that is accessed by an unauthorised party with the user's credentials. For example, an online account may be accessed or controlled by someone other than the legitimate user to share or distribute child sexual abuse material. The legitimate account owner may have been compromised through methods of phishing, malware or stolen credentials.

Has your organisation closed the user's account? If you select 'Yes', provide the date when this was closed.

Has your organisation notified the user of their account closure? Select yes or no.

Device used by the sender/recipient to access their account: Provide details of any devices used by the user to access their profile. These could include but are not limited to, device IDs produced by your organisation, MAC addresses, IMEI numbers of device. Provide details of each device separately.

Date device associated to user: for each device, provide the date the device was last associated to the user. The date must be submitted in DD/MM/YYYY format.

Time device associated to user: for each device, provide the time the device was last associated to the user. The time must be provided in HH:MM:SS format along with the time zone using the time zone drop-down.

You can add additional devices.

Upload biometrics data: Provide a copy of the user's biometric data if held using the "Choose file" function.

Upload voice recordings: Provide a copy of the user's voice data if held using the "Choose file" function. Please note, if your referral is in relation to an audio clip which is of the user's voice, you do not need to re-submit that content here. However, any additional voice recordings which are not in relation to child sexual exploitation and abuse you have of the user would be useful to submit here.

Do you have more information about the content detected that you have not submitted yet? This is in relation to the current user (sender or recipient) that you are providing details on.

If you select 'Yes', please provide this either using the text box or by uploading a file using the "Choose file" function.

This could be further information that relates to the user which could assist law enforcement in identifying them and/or understanding the details of the suspected offence/s.

This is the final page of this section, and once you select "Complete this section", you will be taken back to the main submission page.

Review and submit report

Once you click “Review and submit report”, you will be redirected to a page which will summarise the information you have provided for each section of the report. This gives you an opportunity to double check accuracy and ensure that all the necessary information has been provided.

If you confirm your answers and successfully submit the report, you will receive a ‘report submitted’ completion notice containing a report reference number. Your submitted report reference number will also be recorded in the “Previously submitted reports” section found in your homepage (see page 10).

What happens next:

Your report has been submitted to the National Crime Agency (NCA).

The NCA or the police will contact you if they need further information.

You must keep the content detected by your organisation for 90 days to meet the requirements of the Online Safety Act.

[What did you think of this service?](#)

[Back to home](#)

Supplementary reports

If you have previously submitted a Priority 1 report with limited information and need to provide further information, you can submit this on a supplementary report. To submit a supplementary report, follow the same process as you would usually submit a report through the Child Sexual Exploitation and Abuse Industry Reporting Portal.

A supplementary report may be required when your organisation has previously made a Priority 1 report with limited information relating to the mandatory data fields set out in [Reporting Regulations](#).

Note: If you have found additional suspected illegal content which is linked to the original report, this is a new detected offence and requires its own report with the appropriate priority level. This should not be treated as a supplementary report.

Important

When submitting a supplementary report, please include the report reference number from the original report. Read [Previously submitted report details](#) for more information.

FAQs

What will happen with my report?

All reports submitted to the Child Sexual Exploitation and Abuse Industry Reporting Portal will be sent to and reviewed by the NCA. The NCA will then either send the report to the appropriate internal team, or will disseminate to the appropriate agency to ensure that your report is actioned and children are safeguarded.

Can I save an incomplete report as a draft and complete it later?

Yes. Draft reports are automatically saved every time you click “Save and continue” or “Complete this section”. If you signed out of the portal before completing a report, it will save automatically within the “Previously submitted or in progress reports” section found on your Account home (hyperlink). However, for priority 1 reports it is crucial that you submit the report as soon as possible to ensure that law enforcement can identify and safeguard children at risk. We also urge you to submit priority 2 and 3 reports as soon as possible.

Can I report other crimes types other than CSEA?

No. As per the Online Safety Act, in-scope providers must report detected and unreported CSEA. The CSEA-IRP has been designed for in-scope user-to-user providers to report CSEA and no other crime type.

How to report suspected illegal chat or messages where no media has been uploaded?

If your referral relates to suspected illegal chat or messages where no media has been uploaded, select ‘sender’ for the user who is committing the suspected illegal behaviour. For example, an organisation has detected an adult who is suspected to have engaged in sexual communication with a child. In this scenario, the adult user would be the sender, and the child user would be the recipient.

How long is a draft report available on the portal?

If you have not completed the draft report within 7 days, your organisation administrator will be notified that this draft needs to be completed.

Will I be able to access/download a report that has been submitted?

Once a report is submitted, it is no longer visible to the reporter.

FAQs

Who do I contact if I have a technical issue with the portal?

You can raise tickets in relation to technical issues by contacting the Service and Support desk via telephone 0330 111 5047 (UK) / +44 161 521 8753 (International) or email support@csea-irp.atlassian.net. Please note, the Service and Support desk can only assist with technical queries and not the contents of a report.

I'm having trouble uploading the files to the portal

Material can be uploaded in any format, with the exception of executable (.exe) files, and must be no larger than 5 GB. If you have a file that is .exe or is larger than 5 GB, please convert it to a different file type or size to enable you to submit the report with the file included. If your file continues to get blocked, contact the Service and Support desk via telephone 0330 111 5047 (UK) / +44 161 521 8753 (International) or email support@csea-irp.atlassian.net. Please note, the Service and Support desk can only assist with technical queries and not the contents of a report.

Will I find out the outcome of my report?

Unfortunately, the NCA are unable to provide updates on the outcome of individual reports. In some cases, we may get back in touch, but this will be on a case-by-case basis.

Priority One Contingency Reporting Template

Please note, this template serves as the contingency reporting template for Priority One incidents only and is to be used exclusively in the unlikely event that The Child Sexual Abuse & Exploitation Industry Reporting Portal (CSEA-IRP) is unavailable.

Priority 1 - current or immediate risk to an individual: this should be selected when there is an identified real and immediate threat to a loss of life or to cause serious harm or injury, which includes serious sexual assault and rape. This also includes where a child has been identified as needing immediate safeguarding as the abuse is currently taking place or there is imminent risk of abuse.

All Priority Two and Priority Three reports must be submitted through the CSEA-IRP once the portal has been restored.

This template must be completed with the same diligence and accuracy expected when submitting a report through the CSEA-IRP or via the API.

Upon completion of the below, email this template to DRB@nca.gov.uk and follow up with a call to 01925 663355 to ensure they are notified of the Priority One report. This telephone number must not be used for any other enquires or communications.

Once the CSEA-IRP has been restored, submit the full report as usual following the “How to use the CSEA-IRP” guidance where required and ensuring compliance with the [Reporting Regulations](#).

Please input as much information as possible:

Brief description of the incident including why it has been deemed a priority one
